Archive for Bryology is a "paperless journal" which is published in the internet. It was founded in 1994 as a journal in disk and as an initiative of the International Association of Bryologists, but at first not realized due the fast and always changing developments of computer techniques. Therefore it has later been changed into an internet journal, which provides any bryological contributions as pdf-files.

The aim of the organization is to promote international cooperation and communication

among all persons interested in the biology of bryophytes. This is achieved through sponsorship and arrangement of meetings and symposia that relate to the various aspects of bryology, and by IAB-sponsored publications including *The Bryological Times* and *Bryolophyte Diversity and Evolution*. The Association ...

Much richer than an aligned resource list, the Compendium serves as a "field guide" to the standards assisting biology educators through the somewhat unfamiliar landscape (the new course of study), recommends itineraries that highlight relevant points of interest (suggests ways to sequence activities), and explains their significance within the broader culture (highlighting how the practices and connecting concepts enrich student sense-making).

Mitochondria are complex organelles whose dysfunction underlies a broad spectrum of human diseases. Identifying all of the proteins resident in this organelle and understanding how they integrate into pathways represent major challenges in cell biology. Toward this goal, we performed mass spectrometry, GFP tagging, and machine learning to create a mitochondrial compendium of 1098 genes and ...

Here, we report the creation of a genome-scale compendium of chemical-genetic interactions focused on mitochondrial biology. We use a collection of mitochondrial inhibitors that allows us to model distinct, canonical modes of "mitochondrial dysfunction," including defects in replication and translation of the mtDNA, defects in individual complexes of the electron transport chain, impaired ...
