Current advances in mycorrhizae research | [] OPAC

Although some advances have been made in the 18 years since, mycorrhiza research still largely develops by specializing within different disciplines of biology. During the 19th century, research into arbuscular mycorrhiza commenced with the discovery of fungal structures colonizing roots 2, 3. This early research was initially dominated by the descriptions of fungal morphological traits and potential fungal effects on plant performance. Such early research stayed at the organismal ...

Growing Research Networks on Mycorrhizae for Mutual ...

Mycorrhizal Applications is the industry leader in the research and development of commercial mycorrhizal fungi soil inoculants designed for all industries involving soils, plants, and people. Experts in the production of endomycorrhizae and ectomycorrhizae.
