These notes were prepared for a Year 1 course module in the Department of Engineering and Design at the University of Sussex. The module runs for five weeks, and absorbs 25% of student time. The aim of the course is to develop an understanding of electromagnetic principles and their application in a range of practical electromechanical devices. Instead of the traditional emphasis on mathematical methods,

Offered by Korea Advanced Institute of Science and Technology(KAIST). This course is a continuation of Electrodynamics: An Introduction and Electrodynamic: Analysis of Electric Fields. Here, we will introduce magnetostatics and relate it to the material we learned previously. In addition, we will cover the basics of the electromotive force and how it can be used to build different devices.
