

The image shows a digital whiteboard with handwritten mathematical work. The function is $f(x) = x^3 - 3x^{-2} + 5x^{-6}$. The derivative is calculated as follows:
 $f'(x) = 3x^2 - 3(-2)x^{-3} + 5(-6)x^{-7}$
 $= 3x^2 + 6x^{-3} - 30x^{-7}$
 $= \frac{3x^2}{1} + \frac{6}{x^3} - \frac{30}{x^7}$
 $= \frac{3x^9}{x^7} + \frac{6x^4}{x^7} - \frac{30}{x^7} = \frac{3x^9 + 6x^4 - 30}{x^7}$
The final result is circled in the original image.

AN INTRODUCTION TO BUSINESS STATISTICS . 2 At the micro level, individual firms, howsoever small or large, produce extensive statistics on their operations. The annual reports of companies contain variety of data on sales, production, expenditure, inventories, capital employed, and other activities. These data are often field data, collected by employing scientific survey techniques. Unless ...

AN INTRODUCTION TO BUSINESS STATISTICS

Includes applications of clear relevance to business and economics. Enhances students' understanding by focusing on non-trivial problems. Main Discipline: Statistics

Introductory Statistics for Business and Economics

I ordered a used one and got a new one, that's how great my experience with this seller and product was. The book itself is comprehensible comparing to elementary statistics which is the same, in junior college, this is easier to read. And fair if not a really great price at the time i bought it. Glad I bought it soon before classes began.
