### "How To" Ride a Quad Bike: Quad Bike Series, Part 3 - YouTube

Accelerate slowly in first gear to get the quad moving at a moderate pace. When you feel the need to shift, or when you get to the "top" of first gear, pull in the clutch lever. Pull up on the shift lever with your left foot to switch to second gear, then slowly release the clutch and apply a small amount of throttle. If done correctly, you should now be moving forward in second gear, providing more room for acceleration.

### How to Drive a Quad? I Grand Theft Auto: San Andreas.

After that, lean back and rev the quad up to around half of the powerband. When you get to the hill, start to take your path and try not to stray off it. If you see an area that will cause your wheel/wheels to dip down, do not go near it, you could flip. Proceed up the hill, gradually increasing throttle, but try to keep your speed the same.

Then using your right hand and right foot, apply the brakes to slow down. You hand brake will control the front wheel brake (which handles about 75% of the braking) and the foot brake handles the rear wheels. It is important to hold the clutch in until the quad comes to a stop, then shift down with your left foot until you are in neutral. Then you can release the clutch without stalling the motor.
