Since TARQUIN analyses can be performed from the command line, the batch analysis of spectra can be performed with the aid of a scripting language. If you are using a Unix-like OS and have some experience with the command line then bash is a good scripting language to start with. However bash can be a little ...

TARQUIN User Guide Version 4.3

jMRUI is a software package for advanced time-domain analysis of magnetic resonance spectroscopy (MRS) and spectroscopic imaging (MRSI) data.

jMRUI | Software for the clinical and biomedical MRS

jMRUI includes several quantitation algorithms. Some of them are listed below: SVD based algorithms. The non-interactive black box algorithms based on Singular Value Decomposition (SVD) are efficient for quantitating signals with good signal-to-noise ratios. They are also helpful in parametrizing signals of unknown composition and

shape, but they cannot make use of all available prior ...
