Pneumatic Kelly Spinners currently on the market are single speed (wide open). They are engaged by opening a valve that can only supply full air flow to the motors on the Kelly Spinner which means they can only be operated at full speed (approximately 150-200 rpm, depending on load) when making-up or breaking-out pipe.

SRLF Company manufactures and provides a complete line of rig rotary handling tools.

Main products include manual tongs, rotary slips, power tongs, elevator&spiders etc.

SRLF | Professional Rig Handling Tools Manufacturer

A mechanical device for rotating the kelly. The kelly spinner is typically pneumatic. It is a relatively low torque device, useful only for the initial makeup of threaded tool joints. It is not strong enough for proper torque of the tool joint or for rotating the drillstring itself. The kelly spinner has largely replaced the infamous spinning chains, which were responsible for numerous ...
