Amazon.fr - Manifestations of Aphasia Symptoms in ...

Aphasia symptoms vary in severity of impairment and impact on communication, depending on factors such as the location and extent of damage and the demands of the speaking situation. A person with aphasia often experiences both receptive and expressive spoken language difficulties—each to varying degrees. He or she may have similar difficulties in written language (i.e., reading comprehension and written expression). As with spoken language, written language difficulties can vary in degree ...

Aphasia: Signs & Symptoms - ASHA

The Symptoms of Aphasia Aphasia is a broad-spectrum disorder that can manifest in several ways. There are several distinct and well-defined impairments that frequently overlap depending on the type of aphasia the individual has, as well as the severity of it. As a result, no two individuals with aphasia are completely alike.

The Symptoms of Aphasia | Lingraphica

Some aphasic symptoms might logically be either isolated or general, such as having easier access to nouns than to verbs or the reverse. Empirical cross-linguistic and cross-dialectal studies of aphasia are the only way to distinguish which of these symptoms are general and which are specific to a particular language or language-type. Comparative aphasiology takes as a working assumption that the correct level of explanation for a symptom is one that will work across languages of ...

Michel Paradis, editor: Manifestations of Aphasia Symptoms ...

It is therefore more important than ever to become aware of the manifestations of aphasia in languages other than one's own. A number of factors conspire to influence the symptoms in eac The likelihood of encountering aphasic patients who speak a language other than the one of the clinic in which they are assessed is rapidly increasing to the point of becoming commonplace.

Manifestation of aphasic symptoms in Czech

Aphasia is always manifested in a certain impairment of the morphosyntactic structure. I have analysed spontaneous speech from 18 motor aphasics and discovered the typical manifestations of agrammatism in Czech: (a) omission of some grammatical words (mainly prepositions, auxiliaries and pronouns); (b) concentration of errors in some grammatical categories (especially case, tense and person); (c) overuse of certain forms of grammatical categories (masculine gender, singular number ...

Message 1: Aphasia: Manifestations of Aphasia Symptoms in Different Languages Date: Wed, 13 Jun 2001 14:23:31 +0100 From: Chipperfield, Leighton (ELS) <L.Chipperfield@elsevier.co.uk> Subject: Aphasia: Manifestations of Aphasia Symptoms in Different Languages MANIFESTATIONS OF APHASIA SYMPTOMS IN DIFFERENT LANGUAGES Edited by Michel Paradis, McGill University, Canada

LINGUIST List 12.1570: Aphasia

In Broca's aphasia, they are only five times more frequent, whereas in Wernicke's aphasia the number of phonemic and verbal paraphasias is roughly the same. It is difficult to know how well this distribution fits in other languages, due to the absence of cross-linguistic comparisons. Agrammatism in Spanish has certain distinguishing characteristics, particularly due to the significant ...

The manifestation of aphasic symptoms in Spanish ...

All 3 subtypes are insidious in onset, gradual in progression, and initially characterized by a predominantly isolated linguistic impairment for at least 2 years. 1,2 Progressive nonfluent aphasia presents with effortful, agrammatic speech, anomia, and occasional motor programming difficulties, with relatively spared word comprehension and object knowledge. 3 Semantic dementia is associated with fluent, grammatic speech but loss of single-word comprehension and object knowledge. 3 The term ...

Extrapyramidal Signs in the Primary Progressive Aphasias

Aphasia is an impairment of language, affecting the production or comprehension of speech and the ability to read or write. Aphasia impairs the ability to speak and understand others, and most people with aphasia experience difficulty reading and writing.

Aphasia - Types, Causes, Symptoms, Diagnosis, Treatment

Abstract Few systematic descriptions of aphasia characteristics are available about the Spanish language. Three different language aspects are examined in this paper: phonology, aphasic substitutions (paraphasias), and morphosyntax. It has been observed that phonological errors in Spanish speaking aphasies more frequently involve vowels than consonants.
