Desert enthusiasts travelling through Algeria and Libya discovered that these areas held an important potential for meteorite finds on what was once sedimentary land that

had been subjected to erosion. The emergence of GPS devices then made it possible to explore virgin territories in relative security. Such expeditions, which were conducted by Swiss and German meteorite hunters, would result ...

The Sahara Desert has been a novelty since the beginning of time, spanning over 3000 miles north to south, and across the entire northern cap of the African continent to Morocco. But, what remains the most amazing and mysterious part of this magical land is: how did they get all that sand there in the first place? Did they truck it in? And where did they get it? Aliens, I'll bet. Actually, it ...
