Risk Assessment Principles For The

A risk assessment should: [] ensure significant risks and hazards are addressed [] ensure all aspects of the work activity are reviewed [] take account of non - routine operations e.g. maintenance, cleaning operations etc. [] be systematic identifying hazards and looking at risks [] take account of the way work is being organised and the effects this can have on health [] take account of the risks to visitors and contractors

Basic Principles of Risk Assessment Guidance Note

It specifies principles of risk assessment and risk reduction to help designers in achieving this objective. These principles are based on knowledge and experience of the design, use, incidents, accidents and risks associated with machinery. Procedures are described for identifying hazards and estimating and evaluating risks during relevant phases of the machine life cycle, and for the elimination of hazards or sufficient risk reduction. Guidance is given on the documentation and ...
