What Every Teacher and Student Needs to Know About Memory ...

Beyond understanding the brain's neuroplastic response to stimulation -- how activation and use of memory networks makes them stronger -- future teachers need to recognize how stress inhibits neuroplasticity. It is only when information is processed in the brain's reflective, cognitive prefrontal cortex that new learning can be incorporated into networks of long-term, conceptual memory.

A Neurologist Makes the Case for Teaching Teachers About ...

When we learn something new—when a teacher delivers a fresh lesson to a student, for example—the material is encoded across these neural networks, converting the experience into a memory. Forgetting is almost immediately the nemesis of memory, as psychologist Hermann Ebbinghaus discovered in the 1880s.
